Dear registrars

The latest news from .dk is ready - we hope you will read along.

* More than 64% of all .dk domain names have a DNSSEC signing!
* Incentive payout for January to June
* What is an incentive agreement?
* Update on MitID for Danish companies
* NemID is closing down on October 31st
* Correct contact information on your REG-handle
* New employee in customer service
* Feature requests and known Issues
* Operational status

More than 64% of all .dk domain names have a DNSSEC signing!
Thanks to all of you who have helped ensuring that we have a secure Danish internet with more DNSSEC signed domain names! The more domain names with DNSSEC - the more secure is the Danish part of the internet.

DNSSEC signing means that we can prevent hackers from taking control of a domain name and a website. And it works, because the Telecommunications Industry Association Denmark/the internet providers are ensuring that DNSSEC is on when accessing a domain name (in many other countries the internet providers do not see this as their task.)

In addition, you can check how secure your domains and your e-mails are using our security tool sikkerpånettet.dk. Link here

If you are curious about why it matters that as many domain names as possible have DNSSEC, read more here
You can follow how the Danish zone develops here

Incentive payout for January to June
The incentives for the period from January to June 2023 has been paid out.
If you have an incentive agreement with us, you have received a separate e-mail including information about your incentives.

What is an incentive agreement?
DNSSEC signed domains:
You get 2 DKK per DNSSEC signed domain per year.
* We offer this to increase the signing of domain names with DNSSEC and thereby create a more secure use of the Internet.

<u>Registrar managed domains:</u>
You get 2 DKK per domain per year.
  * A registrar manage a customer's domain name after obtaining the customer's consent before taking over domain name management.

All registrars are offered to enter into an incentive agreement with Punktum dk.

If you are missing information or want to receive an Incentive Agreement contract, contact Elin Smeby, registrar@punktum.dk or phone +45.6170 7708.
You can also get more information about the incentive agreement here

Update on MitID for Danish companies
It is now possible for Danish companies in self-service to complete ID control as a company using a private MitID. By logging in with MitID, the customer is presented to a list of all companies that are linked to the CPR number from MitID.

On Virk.dk you can find a guide that explains in which situations you can use private MitID as a company or as an association. More information here

NemID is closing down on October 31st
Due to the transition to MitID, NemID is closing down on October 31st 2023. This means that Danish registrants will no longer be able to use NemID, and will instead have to use MitID to perform id-control after October 31st 2023. For more information, please see here

Correct contact information on your REG-handle
Just a kind reminder to make sure that you have updated your contact information registered on your registrar account (REG-handle). Please make sure that you have provided us with the correct contact e-mail address, contact person and phone number, in case we need to contact you.

If you need help on how to update, or want information about the current data registered with us, please do not hesitate to contact us, using our contact form
https://punktum.dk/en/contact-customer-service

New employee in customer service
We are happy to announce that we have hired a new employee to our customer service team. Her name is Josephine, and she has already settled into customer support. A warm welcome to Josephine 😊

Feature requests and known Issues
All feature requests and known issues we are currently working on, we are looking into to get a better understanding and the ones we have fixed can be found here.

Operational status
On status.punktum.dk you can get an overview of Punktum dk's operational status and services.
Planned releases are announced via our operational status as well.
New features will be announced no less than 3 weeks prior to release, whereas system changes with no backwards compatibility will be announced no less than 3 months prior to release.
Bug fix releases and security updates can be released on a day-to-day basis, based on severity. Subscribe to notifications and for more information here.

We continuously work on new products and solutions, so we are always curious about your ideas and experiences as a registrar.

Feel free to get back to us with any questions or comments.

Best regards

Elin Smeby
Relationship manager
