Dear registrars

The latest news from .dk is ready - we hope you will read along.

* Extension of transition period until 30th of June 2025
* New registrar portal
* Postponed id-control for registrants using MitID
* Status on tjekpånettet.dk
* Feature requests and known Issues
* Operational status

Extension of transition period until 30th of June 2025
We have decided to extend your option to transfer from registrant to registrar management without using a token, so you will still have access to a smoother transition. *The option to switch to registrar management without a token is extended until 30th of June 2025.*
With effect from 1 July 2025, it will no longer be possible for registrars to move a registrant to registrar management without a token and it will be necessary for the registrant to collect this token from Punktum dk's self-service.

New registrar portal
We have begun analyzing the functions and needs for the new registrar portal.
In order for us to gain a better understanding of what you, as registrars need, we will continue to involve you, and we have, based on our survey already collected very good input.
You are always welcome to supply us with any feedback and in a few months, we will contact you hoping you will get back to us with your needs for functions and features in the portal.

Postponed id-control for registrants using MitID
Earlier this year, registrants performing id-control with a private MitID for their company experienced problems using their MitID in our self-service.
The solution back then was to postpone the id-control for these users, until the issues with MitID was solved, and the registrants were informed about this when they were in contact with us.

The problems have been solved, which means that we will start the id-control for these customers soon. The registrants will receive an e-mail from us, asking them to complete the id-control within 25 days.
This problem has affected approximately 1100 registrants.

Status on tjekpånettet.dk
Tjekpånettet.dk has been well received and per September 15th there has been completed 19.800 tests.
The site has been live for just about one month, the campaign is still active on social media and on various nationwide news sites.
