

Follow-up on NIS2 Requirement

Dear Registrar,

This is a follow-up to the email sent yesterday regarding your responsibility for dispatching communications and updating your customers' data.

It has come to our understanding that it may be difficult for you to be able to comply with the requirements and ensure that Registrant data has been checked/updated within September 1, 2025.

Punktum dk has therefore decided to postpone the deadline for Registrants to check/update their contact information. The deadline for publishing email addresses is postponed until **October 1, 2025**.

This means that you must send emails to Registrants no later than **September 1, 2025**.

Our reassessment and postponement of the announced deadlines has specifically been made based on what we consider reasonable, considering both the summer holidays and the late announcement/adoption of the NIS2 Act.

We also have a correction to the section "Follow up required":

To confirm that all registrants have received the update information, you **must** submit a list to us of all the registrants you have contacted. This list **must** include, at a minimum: User id, Company Name, Domain Name, and Email Address. Please send the list to registrar@punktum.dk.

Please feel free to contact us if you have any questions

Best regards

Med venlig hilsen / Best regards
