

Addendum to Registrant Contract Verification of Identity and Contact Information

Version 1.1, 31 March 2025

1. Background

1.1 The Danish NIS 2 Act, which implements the NIS 2 Directive, establishes rules which state that both top domain name administrators and Registrars must collect and verify certain items of information about Domain Name Registrants and the Points of Contact who administer the Domain Name if this is different than the Registrant.

A partially overlapping obligation in the Danish Domain Names Act requires Punktum dk to collect and verify certain items of information about Registrants of .dk domain names.

1.2 Punktum dk and the Registrar shall cooperate via this Addendum to the Registrar Contract on these obligations so that only one of the Parties performs the necessary verifications of identity and contact information.

1.3 The Addendum is an integral part of the Registrar Contract which is in force at any given time and has been concluded between Punktum dk and the Registrar.

1.4 The addendum concerns collaboration around certain obligations. The addendum does not change the fact that the Parties are independently responsible for complying with their obligations under the NIS 2 Act, regardless of which of the Parties undertakes a specific verification, for example.

1.5 Similarly, any complaints by Registrants and Points of Contact concerning verifications shall be handled by the Party that has performed the verification.

2. Verification of Identity and Contact Information

2.1 With this addendum, Punktum dk allows Registrars to verify identity and contact information themselves, and this includes the use of resellers or other third parties. The Registrar thus chooses whether it shall be the Registrar or Punktum dk who shall undertake the verification of Registrants and Points of Contact.

2.2 If the Registrar chooses to perform the verification, Punktum dk shall not perform verification of the Registrant's or the Point of Contact's information. However, there may be special cases in which it may be necessary for Punktum dk to perform a verification, regardless of whether this has already been performed by the Registrar.

2.3 Registrars who choose to be responsible for verifying identity and contact information must perform the verification in accordance with the Procedure for A Registrar's Verification of Identity and Contact Information which is available here: [insert link].

2.4 If the Registrar verifies identity and contact information, the Registrar must verify the information listed in the Procedure. The Registrar is not obligated to offer its customers all of the verification methods listed in the Procedure.

2.5 The Registrar is liable to Punktum dk pursuant to this addendum and the Registrar Contract regardless of whether the verification has been performed by the Registrar or by a reseller or other third party.

2.6 The verification of a Registrant's identity and contact details must be completed within 30 days. If this does not happen, Punktum dk can suspend all of the Registrant's Domain Names for a period of 30 days, after which they will be deleted.

3. Payment

3.1 The Registrar does not have to pay a fee for the ability to verify identity and contact information. Similarly, the Registrar shall not receive any price reduction or payment from Punktum dk in exchange for verifying identity and contact information.

4. Checks

4.1 Punktum dk may conduct checks on compliance with the Registrar's obligations under this Contract Addendum in accordance with the rules of the Registrar Contract.

5. Entry into Force

5.1 This Addendum to the Registrar Contract shall enter into force on 1 July 2025.
